Sunday January 10

1:00 p.m. – 5:00 p.m.
CST

NAEMSP® National EMS Medical Directors Course & Practicum®

Course Co-Directors:

This course will include:

- A foundation upon which to function effectively as an EMS medical director regardless of EMS system type
- Specific management tools, which may be of use in your local EMS system
- Dialogue with EMS physicians and professionals from a number of different systems that will develop a network for future problem solving
- An understanding of how EMS functions within the broader emergency care system at a local, state, and national level
- A foundation for a career in EMS

EMS Quality Improvement and Safety Workshop

Course Co-Directors:

Are you interested in stepping up the quality of your agency or EMS system? This is the course for you! Designed for EMS medical directors and quality leaders who want to improve the clinical quality of their service and need the tools to be more effective, the course will apply the lessons of healthcare improvement to the challenges of EMS and out-of-hospital care. During the course you will learn the tenets of improvement science and how to practically apply these lessons to your environment, be it a small agency, a larger EMS system or a state-wide effort. The course is designed flexibly – two days are

8:00 a.m. – 12:00 p.m.
CST

MIH-CP for Beginners

Scott Goldberg, MD

This pre-conference allows the learner to grasp the basics of MIH. This is an ideal place for folks who have just started an MIH program or who are thinking about starting an MIH program but don't know where to start. Lectures will include QI metrics, payment models staffing models, how MIH can look in urban/rural locations, and how MIH can be utilized in public health crisis like opioid and COVID-19. There will also be two panel sessions discussing the lessons learned in the first 5 years. The first panel will be from the perspective of medical directors and the second panel will be from the perspectives of the field providers.

1:00 p.m. – 5:00 p.m.
CST

MIH Advanced Topics

Scott Goldberg, MD

The pre-conference is geared to people who are currently running an MIH program but looking to learn from MIH experts at NAEMSP. We are focusing on transitioning from grant driven finances to more stable options. Another focus in learning to engage with public health and health disparities, as this is becoming a larger focus both for hospitals and insurance companies. We will have two panels. The first panel will look at how different programs approach a similar problem (ie. opioids). The second panel will discuss upcoming updates and advances to MIH.

Wednesday January 13

9:00 a.m. – 1:15 p.m.

|-------------------------------|--|--|
| 8:00 a.m. – 5:00 p.m. CST | NAEMSP® Advanced Topics in Medical Direction™ This unique one-day workshop is designed for practicing EMS Medical Directors and others who engage in clinical supervision of functioning emergency medical dispatchers, emergency medical technicians, and paramedics. | Beth Adams, MA, RN, NREMT-P Robert Swor, DO |
| 8:00 a.m. – 12:00 p.m. CST | Faculty Development For EMS Fellowship Directors & Faculty Presentation covering contract negotiations for EMS fellowship directors. This ability is use for fellowship directors to develop better contracts related to running the fellowship. It will also teach skills that can be taught to EMS fellows to utilize in their future clinical and academic practice. Education of recruiting rules within the match process. Interviewing techniques for fellowship applicants. Both are necessary for proper function of an EMS fellowship. | Course Director: Jeff Beeson, DO, FAEMS Course Director: Noel Wagner |
| 1:00 p.m. – 5:00 p.m. CST | From Pile-Ups to Pandemics: Education Tools and Techniques for Disaster & Mass Casualty Incidents This workshop will emphasize means for prehospital disaster education: a. In this interactive session participants will remotely participate in a live simulation, a variety of disaster education video games, and an analog disaster training game. b. Curriculum development: participants will consider the disaster planning needs of their own agencies and regions, and develop a training activity to meet those needs, with support of workshop faculty and their peers. During this phase, participants will workshop their own curriculum, and communicate with other participants and the facilitators during the session via the workshop platform. c. Presentations of developed curricula, questions and answers. | Course Director Mark Cicero, MD |
