Tactical Emergency Medical Support Course: A product of NAEMSP®'s TEMS Task Force

Member Price:\$25 Non-Member Price:\$40

Authors: Alexander P. Isakov, MD; Joseph Heck, DO; Cliff Neal, DO; Marc Gautreau, MD

This Tactical Emergency Medical Support (TEMS) course is an introduction to TEMS for law enforcement administrators. It is a modular, self-directed course in PowerPoint that can be used in its entirety as the basis for a formal TEMS course or on a section-by-section basis to augment other educational programs and learning. This course is formatted onto a CD-ROM. Highlights of the sections include:

- The History of TEMS
- Goals of a TEMS program
- Other Support Functions
- Requirements for TEMS
- What a TEMS program can do for you

System Requirements: Adobe Acrobat 5.0, MS Internet Explorer Web Browser (free downloadable versions of both included on the CD), and Microsoft PowerPoint

Air Medical Dispatch CD: Guidelines for Trauma Scene Response - A product of the NAEMSP® Air Medical Services Committee

Member Price:\$25 Non-Member Price:\$35

In some areas of the United States, air medical helicopter transport is routinely used for responding to trauma scenes, especially motor vehicle crashes. In other areas, helicopters are used infrequently, if at all, for such responses.

The NAEMSP® Air Medical Services Committee felt that there was a need to bring the document "to life" in an effort to better integrate air medical services with ground emergency medical services and public safety officials. Local EMS squads, air medical services, and law enforcement agencies are clearly the important audiences for this educational program.

THANK YOU for your continued support of NAEMSP®. We continue to strive to be YOUR organization, bringing you crucial information that will help you in your role in EMS. Please let us know if there is anything we can do for you.

Mass Gathering Medical Care Planning: The Medical Sector Checklist

Member Price:\$20
Non-Member Price:\$40

Authors: Arthur Yancey, MD, MPH, Jeffrey Luk, MD, Andrew Milsten, MD, Sarah Nafziger, MD

Newly updated in 2017, this edition is an electronic only document available for download and is not available for printing. This comprehensive guidance document addresses development of all elements of planning for emergency medical care at mass gathering events.

Base Station Course: A product of the NAEMSP® Education Committee

Member Price:\$35 Non-Member Price:\$45

Authors: History of EMS: Ed Dickinson, MD; Communications: Jeff Grunow; Personnel and Training: Jack Grandey, NREMT and Ed Dickinson, MD; Medical-Legal: Ed Carlson; Interacting with the EMT-Basic: Ed Dickinson, MD

This course is designed to be of use to all physicians who provide online medical direction to prehospital providers. It is a modular course that can be used in its entirety as the basis for a formal base station course or on a section-by-section basis to augment other educational programs and learning. This course is formatted onto a CD-ROM. Sections include:

- The History of EMS.
- Prehospital Providers (including levels of certification, training and skills).
- Communications.
- Base Station Physician Interaction with EMT-B's (in keeping with the revised DOT EMT-B curriculum).
- Medical-Legal (aspects of medical direction and base station operations).
