9 vtu }vtu #fl# s#un#Mflv# ; #@ #a n~ n ; †

- The process of credentialing specifically involves the attestation by an organization's EMS physician medical director that the EMS provider possesses required competencies in the domains of cognitive, affective, and psychomotor abilities.
- Credentialing involves **at a minimum**: (1) demonstration of sufficient cognitive knowledge; (2) demonstration of mature, responsible affective ability; (3) demonstration of a command of all involved psychomotor skills; and (4) integrating the three previous domains in the application of critical thinking in the provision of clinical care for all acuities of patients that may be reasonably encountered in the jurisdictionally relevant practice of EMS medicine.
